ITEM FOR AGENDA - April Conference

In the past CT's have received CS Records I & II either before or after Ops. Course, Phase I.

25X1A

This is both inefficient and wasteful. CS Records I & II training should be an integral part of ops training - either for CT's, [REDACTED] or TSD technicians - incorporated into the practical exercises of Ops. Course I or BOC.

25X1A

25X1A

[REDACTED] or an [REDACTED] instructor skilled in CS Records instruction, could present CS Records coverage in formal lectures/ seminars, followed by practical application in "live exercises" which would test the trainees' understanding of the CS Records systems and disciplines.

This kind of instruction presented in this manner would be especially profitable for CT's who would go to a Hqs. assignment in the CS prior to going overseas.
